About This Game

THE GAME

Micro Pico Racers is a fun top-down arcade racing game with a retro style graphics where you control of little cars racing over exciting tracks. Start your engines and prepare for the craziest and most addictive racing game ever. Fast-paced racing game with a fresh interpretation of the 16-bit style. This is an arcade racing game based on games that I loved playing in the arcades growing up. You could say it's inspired by those games, maybe a tribute to them or simply a rip off, any of these could be true!

FEATURES

Features:

- Great retro pixel art design.
- Select from over 20 vehicles each with its own unique handling and performance.
 - Grand prix mode with 60 levels provides hours of fun and challenging races.
 - Multiple views (top down, isometric, back view).
 - Detailed pixel art environments.
- Different game mechanics (racing, destroy your rivals, drift challenge, time attack).
 - Great car drive physics.
 - Split screen 2 player mode.
 - Online multiplayer mode.
- Easy to learn, simple to play, but a real challenge to Master.
- An awesome Soundtrack inspired by the glory days of top down racing games.

SOUND

The game's original music and sound design are being carefully put together to create the right atmosphere. Influenced by classic 16-bit era soundtracks.

DEVELOPER

I'm a indie game developer and my name is Josep Monzonís Hernández. I love create simple, fun and well designed games. My great inspirations are mostly games from the 8-bit and 16-bit era. I like every aspect of the process involved in making video games: pixel art, coding, game design and drawing. I've worked on several indie games. Micro Pico Racers is my last solo developed game project and has been in development for the past 1 year.

Micro Pico Racers hopes to bring back the blend of pure fun and challenge that was a staple of arcade classics.

This game is very hard at some points, but at some other points it is fun.. Neat little game. It looks very good and I specially like the 3d camera mode. It's definitely worth the money. The only thing I am missing is a "non-mission" mode for single-player in which you can try out all the different mechanics on your own.

If the "Finished" and "Lost"-screens would then be displayed a little shorter, this would be perfect!

. Perfect little game. Goff ro 99c which is ideal price. Like micro machines without the

\u2665\u2665\u2665\u2665\u2665\u2665t. Pure racing fun! Career is damn tough but makes you want to try again. F A N T A S T I C playability!

It's cute and I enjoyed the challenge - I like the pixel style and it's certainly interesting - worth the \u00a34.

There are just two main issues I have with this:

Firstly, I don't like being thrown back into the menu every single time I fail a challenge, I prefer to be thrown right back in to it, maybe a "retry" option should be there to throw you right back in once you fail a challenge.

Secondly, the difficulty ramps up very quickly - once I'd got a handle on things and started getting in to it, it threw me off that the Novice level 7 is just WAY TOO HARD - it's not a game centered on difficulty so it's not like that's an excuse, nor is this a later on level where you'd expect difficulty, but having just 15 seconds to do that lap, that needs to be changed to 20 at least!.

Fun! Also I find it challenging! So... FUN!. I like this game, especially considering that only one man programmed it.

It has some flaws though. The music is really annoying and there is no option to disable it. There is one option to disable sound, but then u get rid of ALL SOUNDS IN THE GAME. Its weird that he didnt think about this.

Another annoying thing is that u cant setup your own controls.. I normally write longer reviews but i only played it ones and already requested a refund. Why you might ask and "shouldnt i give it a second chance" n stuff. I made a short video which pretty much shows why coz you just CANT make "THAT" in a RACING GAME.

Sorry thats a no-go. THAT is NOT fair in the slightest.
